1. On 28 July 1950 the Reinsdorf (N 52/E 78) airfield was occupied by 42 to 44 IL-10s and 5 U-2 biplanes. The IL-10s, which were covered with tarpaulins, had a directional loop antenna forward of the rudder assembly but no weapons in the cockpit to the rear. Individual planes were uncovered and refueled from four or five fuel trucks. No flights were made between 9 and 11 a.m. Formations of IL-10s coming from the direction of Reinsdorf flew over Jueterbog (N 52/E 69) in the afternoon. \*
2. Several piles of unknown material, about the height of a man and arranged in a row were in front of the aircraft. These were possibly aircraft armament or aircraft instruments. Five trucks, and a radio truck with an antenna about 5 meters high were near the cantonment buildings in the northeastern section of the landing field. Another radio truck with an antenna rod between 4 and 5 meters high was in the northwestern section of the landing field. Trucks [REDACTED] were seen at the entrance of the field. \*\*

25X1A

25X1A \* [REDACTED] Comment. The report confirms that the field is occupied by a ground attack regiment. See (Air) [REDACTED] From the number of planes observed, it is believed that the ground attack regiment exceeds the previous strength of 42 planes. According to ground attack formations observed in the air it is believed that a ground attack regiment is now equipped with 48 planes.

25X1A\*\* [REDACTED] Comment. The motor vehicle numbers belong to units of the ground attack regiment. They were previously observed in Jueterbog-Altes Lager. This again confirms the fact that the ground attack regiment was stationed in Jueterbog before being transferred to Reinsdorf.
